Watching Gluten?

Although we can prepare dishes with gluten-free ingredients, like those you'll find below, we cannot guarantee any of our dishes are completely gluten-free. Even with a strict adherence toward maintaining spotless restaurants, we simply have too much wheat and gluten present to be able to eliminate the cross contamination on our equipment and food prep areas. If you are highly allergic or intolerant to gluten, we recommend checking with your physician before dining here.

Here are a few options and substitutions for when you're watching your gluten.

Of Interest

- We have peanuts, tree nuts, soy, milk, eggs, fish, shellfish and wheat/gluten in our restaurant, and there may be cross contact with your food because of shared cooking equipment. In addition, because we offer so many unique flavors, not every ingredient we use is listed in our menu descriptions.
- Our naturally raised pork is considered a 'lean' meat as defined by the USDA – having less than 10 grams of fat, less than 4 grams saturated fat and less than 95 milligrams of cholesterol per serving and per 100 grams.
- All of our menu items contain fully refined soy oil, which according to the FDA is not an allergen.
- Everything's cooked to order, so there may be some variability in the numbers on the chart. Our food has no trans fats *(except those which occur naturally in beef and dairy)*.
- We periodically update this guide. We also test new dishes or change suppliers and may not be able to reflect such changes within this guide.
